SUMMARY

Business operations and program manager with five years of experience running technology programs across large organizations, working with Operations, Finance, IT, and R&D to get projects delivered on schedule. Track record of building governance frameworks, AI tool rollouts, KPI dashboards, and intake processes that turn operational friction into structured, repeatable programs. Looking to bring that same process-first thinking to operations and program management roles that blend software, AI, product, and cross-functional delivery.

SKILLS

AI & software governance: AI tool adoption and governance, SaaS license management, agentic automation, LLM integration and AI-assisted development.

Project management: Agile, Scrum, Waterfall, hybrid delivery, vendor negotiation, risk management, Gantt planning.

Tools & platforms: MS Project, Jira, ServiceNow, Monday.com, Cursor and other AI-assisted IDEs, dashboarding (SQL, Tableau).

Financial planning: Capacity planning, Annual Operating Plan (AOP) execution, budgeting and forecasting.

IT & infrastructure: Enterprise cloud solutions, cybersecurity and system administration fundamentals, data center infrastructure planning.

WORK EXPERIENCE

Business Operations Manager | Keshet Media Group

2026

- **Cross-functional alignment:** helped stand up a steering committee that set policy for AI tool and workflow approvals, security boundaries, and budget ownership.
- **Adoption & training:** identified roughly 40 employees building their own AI tools without engineering support, and helped design a phased training plan to bring that work under governance.

IT Project Manager & Infrastructure Lead | Applied Materials

2023 – 2026

- **Program management:** managed a large project portfolio across IT and R&D, including a multi-year capital program supporting a new corporate office for 1,200+ employees, coordinating Finance, IT, R&D, and outside contractor teams around a shared construction timeline.
- **KPI dashboards:** built automated dashboards giving executives real-time visibility into schedule risk and budget utilization on multi-million-dollar programs.
- **Budget & stakeholder management:** led budget planning and forecast cycles with Finance and Purchasing, translating issues into decisions for senior leadership.

Operations Manager | IBM

2021 – 2023

- **Infrastructure delivery:** directed IT transformation and infrastructure upgrade projects, managing matrixed teams against scope, budget, and schedule on multi-million-dollar programs.
- **Crisis & change management:** led migration and disaster-recovery initiatives, adapting to changing requirements while keeping systems stable for end users.
