SUMMARY

Business operations and program manager with 5 years of experience running complex technology programs across enterprise organizations. Hands-on technical background with a track record of working across Operations, RND, IT, Security, and Finance to turn operational friction into structured, repeatable programs. Experienced in building governance frameworks, leading AI tool rollouts, coordinating multi-million-dollar infrastructure programs, and delivering KPI dashboards that track real adoption. Seeking operations and program management roles at the intersection of software, AI, product, and cross-functional delivery.

SKILLS

- **AI & Software Governance:** AI tool adoption, SaaS license optimization, AI governance frameworks, LLM-assisted workflows.
- **Program & Project Management:** Cross-functional delivery, Agile/Scrum/Waterfall, hybrid delivery, steering committees, vendor management, UAT & hypercare, risk mitigation.
- **Financial & Operational Planning:** Capacity planning, budget forecasting & planning cycles, process design.
- **Tools & Analytics:** Jira, ServiceNow, Monday.com, Azure DevOps, Confluence, MS Project, SAP S/4HANA, SQL, Tableau, Cursor / AI IDEs.
- **IT & Infrastructure Fundamentals:** Enterprise cloud & data center infrastructure planning, network architecture, cybersecurity governance.

WORK EXPERIENCE

Business Operations Manager | Keshet Media Group 2026

- **AI Governance & Steering Committee:** helped establish a steering committee alongside the CIO and executive leadership to define AI approval workflows, security boundaries, and budget ownership over multiple projects.
- **Adoption & Risk Mitigation:** identified 40+ employees building unmonitored AI workflows outside R&D oversight; designed a phased rollout and governance framework to bring those tools under official compliance.

IT Project Manager & Infrastructure Lead | Applied Materials 2023 – 2026

- **Large-Scale Program Management:** owned the IT/RND project portfolio, including a multi-year infrastructure modernization supporting a 1,200+ employee facility, aligning Finance, IT, R&D, and external contractors to a shared schedule.
- Manage the full project lifecycle for complex production and development initiatives supporting R&D
- **Procurement & Long-Lead Planning:** translated technical requirements into bills of materials, procurement strategy, and long-lead item tracking for production and R&D infrastructure, carrying projects from planning through execution and handover.
- **KPI Dashboards & Executive Reporting:** built automated SQL and Tableau dashboards giving senior leadership real-time visibility into budget utilization, milestone health, and risk across multi-million-dollar programs.
- **Budget & Stakeholder Management:** managed recurring budget planning and forecast cycles with Finance and Purchasing, translating technical delivery constraints into actionable executive decisions.

Operations Manager | IBM 2021 – 2023

- **Infrastructure Delivery:** directed IT transformation and infrastructure upgrade projects, managing matrixed engineering teams against scope, budget, and delivery timelines.
- **Crisis & Change Management:** led cross-system migration and disaster-recovery initiatives, managing configuration updates while ensuring continuous operational stability for end users.
- **UAT & Hypercare Ownership:** owned UAT and hypercare for major upgrades, coordinating on-site technicians and operations teams to keep adoption smooth and business disruption minimal.
