SUMMARY

- **Business operations and program manager** with **6+ years of experience running complex technology initiatives** across both small and large organizations.
- **Hands-on technical background** with a track record of working across Operations ,RND, IT, Security, and Finance to turn operational friction into structured, repeatable programs.
- **Experienced in building governance frameworks, leading AI tool rollouts**, **coordinating multi-million-dollar infrastructure programs,** and delivering on **KPIs and build dashboards that track real adoption metric.**
  Seeking operations and program management roles at the intersection of software, AI, product, and cross-functional delivery.

SKILLS

- **Program & Project Management**: Cross-functional delivery, Agile/Scrum/Waterfall, roadmap planning, PMO & portfolio governance, steering committees, OKRs & KPIs, change & release management, vendor management and negotiation, UAT & hypercare, risk mitigation.
- **AI & Software Governance**: AI adoption & governance frameworks, SaaS deployments and license optimization, AI agents & automations + LLM-assisted workflows and agentic development (AI IDEs/ harnesses).
- **Financial & Operational Planning**: Capacity planning, budget forecasting, TCO/ROI analysis, CapEx/OpEx and profitability tracking, procurement, process design.
- **Tools & Analytics: Delivery** (Jira, Azure DevOps, MS Project, Monday.com, Confluence) · **ITSM & ERP** (ServiceNow, SAP) · **R&D** (SLDC, Git, Docker/ K8, Vercel, Netlify, n8n, Make, Zapier, Postman, REST APIs).

EXPERIENCE

Business Operations Manager | *Keshet Media Group* *2026*

- **AI Governance & Steering Committee:** helped establish a steering committee alongside the CIO and executive leadership to define AI approval workflows, security boundaries, and budget ownership over multiple projects.
- **Adoption & Risk Mitigation:** identified 40+ employees building unmonitored AI applications and workflows outside R&D oversight; designed a phased rollout and governance framework to bring those tools under official compliance.
- **AI Intake & Adoption Tracking:** helped build a governed intake process for 80+ AI use cases across about 90% of departments, and contributed to a Helpdesk dashboard tracking adoption and requests.

Program Manager | *Applied Materials* *2023 – 2026*

- **Large-Scale Program Management:** Fully owned an IT/RND project portfolio of 10+ projects year round ,including business applications, infrastructure and business wide modernizations supporting 4,000+ employees. Managed the full project lifecycle from E2E for complex development and production enviroments, reaching the projected KPIs, functionality & ROI.
- **Procurement & Long-Lead Planning:** translated technical requirements and system design into bills of materials, procurement strategy, and long-lead item tracking for production and R&D infrastructure, carrying projects from planning through execution and handover.
- **Budget & Stakeholder Management:** managed recurring budget planning and forecast cycles with Finance and Purchasing, translating technical delivery constraints into actionable executive decisions.

Operations Manager | *IBM* *2021 – 2023*

- **Infrastructure Delivery:** directed IT transformation and infrastructure upgrade projects, managing matrixed engineering teams against scope, budget, and delivery timelines.
- **Crisis & Change Management:** led cross-system migration and disaster-recovery initiatives, managing configuration updates while ensuring continuous operational stability for end users.
- **UAT & Hypercare Ownership:** owned UAT and hypercare for major upgrades, coordinating on-site technicians and operations teams to keep adoption smooth and business disruption minimal.

NOC Engineer | *Buildots (An AI first construction-tech startup)* *2020*

- **Monitored the AI pipeline** across multiple concurrent customer projects, tracking and resolving machine learning processing errors and provided resolution metrics and optimizations.
- **Coordinated** and prioritized daily tasks for the company's outsourced **QA team**.
- I**ntegrated new system features** and versions from Dev to the team and fed improvements back for production.
- **Worked daily with R&D and Operations** to escalate pipeline issues and support releases.

EDUCATION

- **B.A, Information Systems & Business Administration** | *Ruppin Academic Center* · ***Cum Laude*** **2020 – 2023**
- **AI Implementation in Organizations** | *HackerU* **2026**
- **AI Performance Engineering** | *Nebius Academy* **2026**
- **IT Solution Provider** | Schneider Electric **2025**
- **Data Center Certified Associate (DCCA)** | Schneider Electric **2025**
- **Military Service: Communications Technician & C4I Platoon Sergeant** **2015 – 2018**

LANGUAGES

- **Native English (Canadian citizen)**
